DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16 and 18-20, drawn to keystroke interpretation system, classified in class 710, subclass 67.
- II. Claim 17, directed to a user input device, classified in class 710, subclass 73.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require Iroha ordering of the mechanism of the subcombination as claimed. The subcombination has separate utility such as a keyboard for entering Japanese symbol.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

In the event that invention I is elected, claim 1 is generic to a plurality of disclosed patentably distinct species comprising:

Latin and Bopomofo to Hanzi symbols;

cHiragana to Kanji symbols;

cLatin to Kanji symbols;

Latin to Kanji symbols;

Hanja to Jamo symbols;

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
